Art Unit: 3742

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-36 and 47-59, drawn to method and apparatus for plasma processing, classified in class 219, subclass 692.
- II. Claims 37-46, drawn to method of and apparatus for microwave plasma production, classified in class 219, subclass 690.

The inventions are distinct, each from the other because of the following reasons:

The invention of Group I sets forth the slotted applicators as being offset in a direction parallel to the surface and the invention of Group II is not drawn to an offset structure.,

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
